

# Device Directions

If you received either an HP Revolve or HP Probook (windows-based device). In order to effectively use the device at home, you will need to log-on for the first time on Baltimore County WIFI with your child's BCPS username and password. This information will be provided to you by email from your child's teacher by Friday, September 4<sup>th</sup>. In order to do so, your family should:

- Visit the parking lot of **ANY** BCPS public school (At our building, the WIFI signal is strongest by walking to back of our building or can be done from the side parking lot near our cafeteria).
- If you connect to BCPS WIFI and are still unable to login, then you should place a ticket with BCPS Serve.

***Thank you and we look forward to a successful school year!***
